A new lily - Absolutely hardy

LILIUM DAURICUM

HABITAT—South East Siberia—perfectly hardy in all climates.
COLOR—Very dark red—Spotted.
HEIGHT—30 to 40 inches—many stalks throw from 9 to 22 blossoms.
BLOOMS—June 15th to July 1st.

From two bulbs which we imported 14 years ago we now have for the first time a sufficient quantity to offer you. Delivery will be made September 1st.

Every one of our customers should have at least one bulb of this beautiful flower. Imagine a red Easter Lily and you can readily see what an impressive flower is the Lilium Dauricum. Being a native of Siberia, the Dauricum is the one lily that is absolutely hardy in any climate in America and its beautiful upright flowers of deep dark red make it as one leading botanical authority has said—“A lily of rare merit.” After seeing the flowers you will agree that the bulbs would be easily worth $2.00 or $3.00 and it is a great pleasure for us to be able to offer first size bulbs—while they last at each (including packing and postage) $0.80c

1. LARKSPUR-LaFRANCE.
   This new and outstanding variety is without question the culmination of beauty in the stock-flowered Larkspurs. The flowers are of a pleasing salmon-pink and the variety is much more vigorous and taller-growing than other light shades on the market today. The large well formed double flowers, well placed on the long stems to set off its attractiveness, present a beautiful appearance which has won it instant recognition from the most severe critics. Your 1929 garden will not be complete without this striking and popular annual. Our supply of seed is limited. Please order early. Trial package 20c; 2 for 35c.

2. SCABIOSA COLUMBARIA.
   This is the South African form of the European Scabiosa. It can be briefly described as a hardy low growing perennial with fine light green foliage, some of the flowers measuring from two to two and one-half inches across with short compost petals, borne on long, slender, but strong stems. Valuable as a florist's cut flower. We offer this in two favorite colors—pink and lavender.
   We consider Columbaria a valuable addition to the perennial list and urge you to try at least one package of each color. We have brought the price down within reach of all. Packet 15c.

3. ESCHSCHOLTZIA RAMONA.
   A new California Poppy. Among the fancy varieties introduced during recent years, Ramona, stands out as a distinct and very charming type. The color is a pale but glittering coppery gold with pink shadings, and very pleasing to the eye. It is a frilled type which gives it the appearance of a semi-double. This usually attractive novelty should be included in every collection. Generous package 20c.

4. DELPHINIUM—EMMA V. WHITE'S HOLLYHOCK STRAIN.
   This striking type is the result of several years of painstaking re-selecting by our plant hybridizer and is a fine mixture of all light shades, pale clear blue predominating. The flowers are large, truly double, well placed on long pyramidal spikes, their sturdy growth and appearance reminding one of a hollyhock. To those of you who wish a select strain of improved Delphinium for your perennial garden, we highly recommend it. Package 15c.

5. PETUNIA—NEW DWARF CALIFORNIA GIANTS.
   By far the best strain of Giant Petunias for pot culture and for window boxes. We do not hesitate in recommending it and in saying that it is the most compact Giant Petunia with the largest and best formed flowers of any variety in existence. Considering that our actual growing costs average over $600.00 per pound, we feel that we have priced this very reasonable. It is an exceptional strain. Standard size pkt., 30c.

6. INCARVILLEA-VARIABILIS.
   A brand new perennial which if planted early in the Spring can be handled as an annual. Valuable for filling and border work and produces a good showing of medium sized, attractive trumpet shaped flowers the entire summer. Colors range from yellow and white to deep pink, with many shades of pink in the collection. A real valuable addition to the perennial border. Packet 25c.
   If you order from our catalog in the amount of $3.00 or more and your order is postmarked on or before February 1st, 1929, we will give you one package free. Please ask for it on your order.
1. NEW IMPERIAL JAPANESE SNAPDRAGONS (Giants).

Every year sees new development in this wonderful family of flowers. This new Imperial far surpasses anything yet introduced. The plants are very robust, forming spikes of beauty from 3 to 4½ feet tall. The flowers themselves are placed closely on the stems. All of loveliest and softest shades are found in the flowers. They are as easily grown from seed as any other Snapdragon. They must be staked for success. For cutting, these Snapdragons are unsurpassed.

BUNCH OF LILAC—Lilacly purple.
GOLDEN QUEEN—Deep yellow.
PURPLE KING—Deep glowing purple.
SNOWFLAKE—Pure white, yellow tube.

“Highly Commended” by the Royal Horticultural Society of Great Britain. A beautiful shade of Peach Blossom Pink, large size and long stems. An excellent cut flower. Pkt. 20c.

4. GIANT IMPROVED RANUNCULUS.

A truly wonderful new type. It is very strong and vigorous in habit with stems of blooms 18 inches to 2 feet in height, each flower very large, generally 3 to 4 inches in diameter, while the giant Florentine strain has flowers 4 to 5 inches in diameter. The very double flowers have most varied colors—white, shades of yellow, deep mauve, many shades of pink, rose, and crimson, with bronzy shades, some blotched and many picotee edged. Sow thinly in pans in good turfy loam in early spring. Seedlings will generally bloom the first year, but will be at their best the second year, grown out of doors from roots formed the first year. Our mixture includes seeds of the expensive Florentine strain. Per pkt., 25c.

5. NEW SNAPDRAGON—COPPER KING.

An excellent specimen of this grand family of flowers. Color is a velvety copper scar¬let. Large pkg. 15c.

FERNOLA—Restores failing ferns and plants. Per pkg., 13c; 2 for 25c.
6. DOUBLE BACHELOR BUTTONS (Centaurea Cyanus.)

The Bachelor Button is one of the most popular annual summer flowers. It is easily grown from seed and it usually reseeds itself year after year. You must try these because the flowers are large and double; a great improvement over the old-fashioned variety.

The flowers are 3 to 4 inches across of a beautiful lilac-blue shading to a deep blue and are borne on stalks 1½ to 2 feet long. 8. DOUBLE ORANGE CALIFORNIA POPPY—Eschscholtzia Crocea Flora Plena.

Very fine double large orange flowers, almost like a Marechal Neil Rose, very select stock. The long stems make it splendid for cutting. Per pkt., 15c; 2 for 25c.

9. DELPHINIUM CARDINALE (Red Perennial Larkspur).

An unusual Delphinium growing 3 feet high. The orchid-like flowers are a brilliant scarlet in color. One of the most brilliant and effective varieties. Per pkt., 20c.

This little known flowering plant is a beautiful gem for rockeries, borders, beds, etc. It creates a sensation wherever seen. An annual of dwarf compact growth with showy bright yellow double flowers with jet black centers. In bloom all summer. 11. CYNOGLOSSUM COELESTINUM BLUE GEM (Hound's Tongue).

A very beautiful annual with sky-blue cup-shaped flowers. The plant is of compact growth resembling the Forget-me-not. It blooms all summer. No special care is required to create attractive beds or borders with it. Sow in April or May, covering with ¼ inch of fine soil. Per pkt., 15c; 2 for 25c.

They are useful for cutting as they are borne on long stems on plants which grow about 20 inches tall. For extra early flowering the seed should be started during March. If sown in the open in April, they will flower in July. If sown in July a fine display may be had in late fall. Per pkt., 15c; 2 for 25c.

13. CALENDULA, ORANGE KING (True Strain).

Double, dark orange red, dark center, a very select strain grown with greatest care for our customers. The plants in the open ground attain a growth of 18 inches high and produce magnificent blossoms 3½ inches in diameter. Per pkt., 10c; 3 for 25c.

NEW SUPERB MAMMOTH BLOTCHED GIANT PANSIES

By far the most beautiful, most striking Pansy we have ever offered. The plants are of very robust growth with exceptionally vigorous foliage. The border of nearly every petal is undulated and curled, making an appearance entirely new to the pansy family.

Most noticeable of all in this wonderful strain is the brilliancy and richness of color. Mixture contains many different colors including some entirely new shades of red and brown. Our quantity of seed is limited, so would advise early selection. Order some of these seeds this year and your Pansy Garden will be the talk of the town.

CLIMBING VINES AND FLOWERS

ALLEGHENY VINE OR MOUNTAIN FRINGE

ADLUMIA CIRRHOSA. A beautiful hardy climber, very desirable for covering trellises, stumps of trees, fences, etc. While an annual it reseeds itself from year to year and might well be considered a perennial. Beautiful soft foliage, quite similar to Maidenhair Fern. Pretty flesh-colored and pink flowers resembling the Bleeding Heart. These should grow and blossom the first year from seed. Pkt., 15c.

JAPANESE KUDZU VINE

(Pueraria Thumbergiana)

This remarkable vine, often called "Jack-in-the-Bean stalk," will grow anywhere in the best or poorest soil. The growth is very rapid and it oftentimes reaches a height of 75 feet in one season. Fragrant purple flowers resembling a purple Wisteria; invaluable for covering porches, etc. Pkt., 15c; 1/4 oz., 45c; 1/2 oz., 60c.

MAURANDIA VINE

Graceful, delicate annual from Mexico. Fine for baskets and vases in sheltered positions, both the flowers and foliage being very beautiful. Our mixture consists of blue, white and mauve. Start indoors during March and set out when the weather is quite warm. Thrives in a rich, sandy soil. Pkt., 15c.

WILD CUCUMBER VINE

CANARY BIRD FLOWER

A very excellent climber for the porch or trellis; the growth is very rapid and the foliage very pretty. Bears curiously shaped canary yellow flowers with similar likeness to a bird with outstretched wings. We recommend this as one of the most desirable vines that can be grown from seed. Annual. Pkt., 20 seeds, 8c; 1/4 oz., 30c.

THUMBERGIA — BLACK EYED SUSANS

This fine, slender growing climber from Africa is exceptionally useful for covering wire trellises and also for vases in the garden or house. They are very attractive if grown as a trailer on the ground. The colors are white, yellow and orange, and of each color there is a variety with white eyes and also black eyes—the latter being called "Black-eyed Susans." Blooms continuously from the first approach of summer until frost. Sow seeds indoors in March and outdoors in May. Pkt., 10c; 1/2 oz., 50c.

CARDINAL CLIMBER

We feel that everyone who has a flower garden should have this favorite climber. The vine quickly reaches a height of 30 feet or more. The blossoms are about 1 1/2 inches in diameter, in clusters of five to seven blooms each, and as the name indicates, are of a rich cardinal red. It likes sun and good soil, and develops to perfection in a sandy loam soil. If started in the open do not sow until warm weather, as the seed will rot in cold, wet ground. File each seed, or slightly cut through the outer covering, soak in lukewarm water over night, and sow in a warm place. Pkt., 10 seeds, 12c; 1/2 oz., 50c.

Miss Emma V. White, Minneapolis, Minn.

I am always satisfied with your seeds. Yours truly, Ruth Krumm, Decorah, Iowa. R. 3.

Dear Miss White:-

Over twenty years ago when I was just a small girl I ordered seeds from you and thinking back I remember how perfectly beautiful were some sweet peas from your seeds. Just now I want to plant some pansy seeds in a cold frame for spring use.

Respectfully, Geneva S. Ogden, 937 Fifth St., Lawrence, Kansas.
